INTIMATIONS.

AERATED WATERS.

Much time and attention is given to this branch of the business and our process ensures perfect filtration and purification of the Water adjustment of the ingredients, and saturation with gas. The average pressure in the Soda Water is 36 lbs. to the square inch.

The Machine is of the latest and most improved type driven by a 6 H.P. Engine.

We would recommend the following facts to our customers—
If Aerated Water is opened carefully and without agitation it will retain as much gas as if it were under a pressure of two atmospheres. If opened and decanted in a violent manner it retains only what it is capable of absorbing under the ordinary barometric pressure. Aerated Water should be stored with the cork covered by the water.
